Subject: Re: Same CSD map with street names labeled

I'm off for the rest of today. I'll look tomorrow. The county map you just sent looks good. UWSP used the same data source I did so points are all the same. Only difference is that I have more addresses in Nakoosa where I think there are water systems. UWSP or the county must have removed them since they know where the systems are. Probably worth confirming with our drinking water folks.

Does this match up with your parcel data for the Central Sands area?

Milo created this map in 2016.

Subject: Same CSD map with street names labeled

And here is the same map with the streets labeled by name. Much more busy, and I had ArcGIS automatically place the labels. Much quicker to do it this way, but some labels may be overlaying other features I have displayed and labeled.

Subject: CSD map still waiting on my getting access to Sam's data

Cheryl, Ryan,

Although a TSR is going through sign off for me to get Sam's data from the computer he was using (Janice Huang told me that UIC Branch needs to approve), I thought I should send you the 'everything' map on CSD that includes everything except Sam's data. That map is attached as I can't print any maps right now as my new computer needs to have drivers installed for the plotters. The attached map is et up as a poster size, do not attempt to send to a printer yourself if you don't have access to a plotter.

Please let me know if you need any other changes in addition to having Sam's well monitoring data added to the map.

Milo
